

After introducing our Explorer Trolley system last year, we received many requests for a similar trolley system that could handle heavier cameras. The rails of the new Porta-Jib Tracker system are spaced further apart than the Explorer and the larger trolley uses interchangeable inserts to accommodate three standard fluid head bases: 100mm, 150mm, or Mitchell. The Porta-Jib Tracker system is larger, stronger, and less prone to tipping when carrying a bigger camera system. Sixteen unique wheels with grooved centers lock the trolley securely on the dovetailed rails. With integrated bubble levels on the end stop clamps, the Porta-Jib Tracker system is designed to be safe, smooth and quiet.

PORTA-JIB TRACKER

BY LOSMANDY

Portable elevated trolley system

The any-environment track/trolley system that can be configured to any length in 3 foot (.9m) increments. Supports cameras and fluid heads with a total combined weight of less than 80 lbs. (36 kg.) Extremely portable, quick to set-up, perfect for shooting anywhere from a studio to mountainous terrain.

\$3810 as shown: 12 foot Porta-Jib Tracker with rails, cross supports, undercarriage support, 4 monopods, 2 end stops and 16 wheel trolley with 100mm insert. Package includes 2 custom PortaBrace bags. Camera and fluid head not included in package pricing. Add \$75 to upgrade to 150mm insert.

When using cameras and fluid heads with a total combined weight between 50 to 80 lbs., additional support is needed. The 12 foot Porta-Jib Tracker can be configured using a total of 9 monopods. In this configuration the undercarriage support is unnecessary.

End stops have a bubble level.

\$4210 as shown: 12 foot Porta-Jib Tracker with rails, cross supports, 9 monopods, 2 end stops and 16 wheel trolley with Mitchell insert. Package includes 3 custom PortaBrace bags. Camera and fluid head not included in package pricing. Add \$75 to upgrade to 150mm insert.

\$2810 as shown: 6 foot Porta-Jib Tracker with rails, cross supports, 4 monopods, 2 end stops and 16 wheel trolley with 100mm insert. Package includes 2 custom PortaBrace bags. Camera and fluid head not included in package pricing. Add \$75 to upgrade to 150mm insert.

PortaBrace custom-designed bags for Porta-jib products.

Leveling feet can be added to any of the cross supports for Low Mode work.

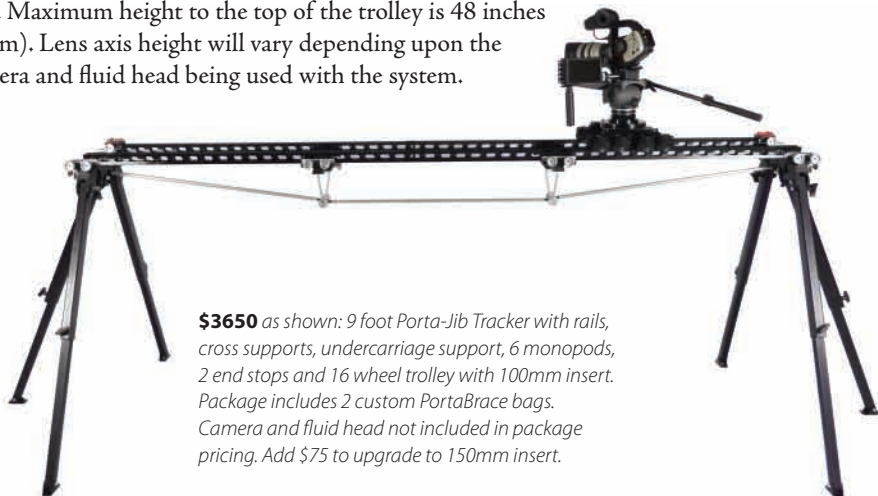

Adjustable angle tops and telescoping legs make leveling easy. Note that the clamps can rotate 90 degrees for use as third leg stabilizer.

\$3450 as shown: 9 foot Porta-Jib Tracker with rails, cross supports, undercarriage support, 4 monopods, 2 end stops and 16 wheel trolley with 100mm insert. Package includes 2 PortaBrace bags. Camera and fluid head not included in package pricing. Add \$75 to upgrade to 150mm insert.

When fully extending the monopods to maximize the height of the rails, an additional monopod should be added to each end. Maximum height to the top of the trolley is 48 inches (1.2m). Lens axis height will vary depending upon the camera and fluid head being used with the system.

\$3650 as shown: 9 foot Porta-Jib Tracker with rails, cross supports, undercarriage support, 6 monopods, 2 end stops and 16 wheel trolley with 100mm insert. Package includes 2 custom PortaBrace bags. Camera and fluid head not included in package pricing. Add \$75 to upgrade to 150mm insert.
